DISPOSED TO COMPROMISE WITH THE WATER COMPANY.

THE BOROUGH COUNCIL NOT

What Members of the Company and Council Said Wher They Met to Discuss the Ques-

The members of the joint committee on ow water works say that the estimates sade by them and published in the Hgaall were not estimates on the comof ew plant, but on what they consider the dant of the old company is now worth.

It seems that the meeting of represents ives of the company and the Borough I uncil has availed nothing-

Dr. Callen appeared in behalf of the vater company. He said it would be a uoral wrong for the borough to pursue a undictive course against the stockholders of the company who knew nothing of the cuit at Pottsville.

Councilman James vald he coubted that here was one of the stockholders ignorant

Councilman Wurm said he didn't like the way things went-three different comnittees having represented the water company in the present controversy.

Councilman Lamb said the only way out of the thing was for the joint committee to out in new water works, as instructed by he meeting of citizens. Councilman Scheifly asked if the

borough accepted the proposition of the water company would it raise individual water rents.

Mr. Catten said it would not.

Mr. Martin Purceil said he knew nothng of the Pottsyille suit until simost the last minute and that he czuremed the opinion before the verdict that the company should lose.

Mr. Michael O Hara said he was a small tockholder in the water company. That he knew nothing of the suit until he saw the books in Pottsville. He also said Wash know the men who brought the suit. Some of them are nice men and ome of them are not so nice. M stakes made by them should not be put on all the stock solders of the company."

Councilman Lamb stated that the joint ommittee is going ahead as carefully as ossible, acting under legal advice, an i Council need not be afraid of what is being lone, as the committee understands the situation well. It has in contemplation enermous engines for the pumping station, a lam on the mountain, two or three miles of the best 12 inch extra beavy pipe to pump through, a large dam to contain 10;-0.0.000 gallons of water, or enough to k ep the town supplied for 14 days, 12-inch nains for the town, an increase of fire plugs and many improvements; and the whole will cost many thous ads of dellars less than the Water Company asks for its boys go there and I know of a good many mant. Mr Lamb said he preferred not shifts of not less than eight men each, stating the figures at present. He said that f the propelition of the Water Company this den and if it is not closed I will report and been r asonable it would probably have been accepted. He also stated that if any member of Council wants informs.

on the subject he can easily obtain it by suplying to any member of the joint committee. He closed by saying that the proposed new works can be completed in nine months.

"Oh! What a Night!"

The success of both star and comedy was most pronounced. The piece affords the star excellent opportunities for the favorable display of those peculiar powers to please which made him popular, and, more than this, it is a really meritorious comedy, rich in laughable incidents, confusing contretemps, amusing accidents, and funny situations. It belongs to that class which was made popular by Mr. Charles Wyndham and his company, and it is by no means the poorest thing of its kind which has been given here -Boston Herald.
